Company profile

Medical consumables for clinics in the United Arab Emirates

About Osmo Medicals

Osmo Medicals is a new business focused on the sale and supply of medical consumables to clinics in the United Arab Emirates. We are building our offering around everyday outpatient requirements, with an emphasis on suitable products, clear quotations and practical ordering support.

We aim to work closely with clinic owners, administrators and clinical teams to understand their preferred specifications and purchasing needs. Our goal is to make routine consumables purchasing straightforward and support lasting customer relationships.

Our mission

To help clinics source the consumables they need through attentive service, clear product information and dependable supply arrangements.

Our vision

To become a preferred medical consumables supplier for clinics across the UAE, earning repeat business through consistent service and responsible commercial practices.

Consumables portfolio

Our product offering is being developed around the following categories, with the final selection tailored to each clinic's services and requirements.

Category	Examples of products
Examination supplies	Examination gloves, medical masks, examination couch rolls and tongue depressors
Dressing supplies	Gauze, wound dressings, medical tapes and bandages
Injection supplies	Syringes, needles and associated disposable supplies
Sample collection	Specimen containers and collection supplies matched to the clinic's requirements
Disposable accessories	Disposable gowns, aprons, caps, shoe covers and sharps containers

Specific brands, sizes, pack quantities and availability are confirmed in the quotation.

Clinic supply and customer support

Our service approach is designed around the clinic's purchasing requirements, from the initial enquiry to repeat orders.

Support for your clinic

- **Product sourcing:** Reviewing requested items against the clinic's specifications, preferred brands, pack sizes and intended use.
- **Clear quotations:** Setting out product descriptions, quantities, pricing and commercial terms so buyers can review the order before confirming.
- **Repeat purchasing:** Helping clinics organise their regular consumables requirements and plan replenishment around agreed availability and delivery arrangements.

Our approach to quality

Our sourcing and supply priorities are appropriate product documentation, identifiable batches where applicable, suitable remaining shelf life and intact packaging. Product selection must also take account of applicable UAE regulatory requirements.

We aim to keep product specifications clear and raise any proposed substitution for the clinic's approval before supply. Storage and handling requirements should follow the manufacturer's instructions.

How to order

1. **Share your requirements:** Send your item list, specifications and quantities, together with the delivery location and required date.
2. **Review the quotation:** Check the proposed products, availability, pricing, delivery arrangements and payment terms.
3. **Confirm your order:** Approve the agreed quotation and provide the purchase order or other required confirmation.
4. **Plan your next order:** Review usage and future requirements to support timely repeat purchasing.
